Table C4 provides budget performance details for revenue by source and expenditure by type. For revenue, the main deviations from budget projections are on property rates, service charges – electricity, refuse, rental of facilities and equipment, interest earned – external investments, interest on outstanding debtors, fines, penalties and forfeits, licenses and permits and other revenue.

In the case of expenditure, the following line items reflect material variance; Remuneration of councilors, Bulk purchases, other expenditure, debt impairment, depreciation and asset impairment, finance charges, employee related costs, other materials, and transfer and subsidies.

Reasons for deviations will only be provided for material variances and a variance is deemed to be material if it is 10% and more.

Supporting table SC3 provides a breakdown of the debtors. The outstanding debtors as at end of April amount to R105, 729 million. The debtors' book is made up as follows:

- Rates 42%
- Electricity 13%
- Rental 1%
- Refuse removal 13%
- Interest on Debtors 30%
- Other 2%

The debtors' age analysis is graphically presented below.

Figure 3: Debtors age analysis

Figure 4: Monthly debtors book

The initial graph compares debtors' age analysis for 2018/19 financial year and 2019/20 (as at end of April 2020) whilst the latter shows monthly movement of debtors for both the current financial year and the 2018/19 financial year. The debtors book is materially less than the 2019/20 monthly figures and this is an indication that the municipality is not performing well in terms of collection.

Below is list of top twenty debtors that contribute significantly to the ever-growing debt book.

Supporting table SC4 provides creditors age analysis. In terms of section 65 of the MFMA all creditors must be paid within 30 days of receiving an invoice. The municipality is having challenges relating to extraction of creditors age analysis and below are the contributing factors:

- Goods received vouchers (GRV) are only processed on the system as and when we are about to pay and this approach distorts the entire picture of ageing our creditors since the system will count the number of days taken to process an invoice from the date the GRV is processed.
- The contracted services are paid through direct/straight payments that do not feed the age analysis module.

Proposal was made that the municipality need to maintain the invoice register that should be used for manually updating the creditors age analysis and the Budget and Treasury department is in a process of implementing the proposed register.

TOP CREDITORS PAID

The Municipality did not have creditors for the month of April 2020.

Supporting table SC13a, SC13b and SC13e provide details of capital expenditure in terms of asset classification based on new assets and renewal of existing assets; while table SC13c provide details of expenditure performance on repairs and maintenance by asset classification and Table SC13d presents expenditure on depreciation and asset impairment. These tables present the capital programme, and assets management and performance of the Municipality.

The total expenditure for new capital projects amounts to R52, 917 million and the year to date budget is R58, 776 million that reflects under spending variance of R5, 860 million that translates to 10% variance.

The year to date actuals on renewal of existing assets amounts R12, 722 million, and with the year to date budget of R14, 097 million and this reflects under spending variance of R1, 375 million that translates to 8.9% variance.

The year to date actual expenditure on repairs and maintenance is R9, 167 million and the year to date budget is R11, 437 million, reflecting under spending variance of R2, 270 million that translates to 19.8%.

The year to date actual expenditure on upgrading of existing assets is R10, 134 million and the year to date budget is R10, 110 million, reflecting over spending variance of R24 thousands that translates to 0%.

The year to date actual expenditure on depreciation and asset impairment is R273 thousands and the year to date budget is R35, 068 million, reflecting spending variance of R34, 795 million, that translates to 99% which means the integration between asset management system and core financial system is done bi-annually and this is one of the requirements for implementation of mSCOA. However the municipality did not prepare either six nor nine financials hence there is still under spending on depreciation and asset impairment. This is basically mean that the municipality is partially complying with some of mSCOA requirements.
