The Mayor of Elias Motsoaledi Local Municipality Cllr David Tladi and his 9 members of mayoral committee convene a two-days mayoral lekgotla to sketch out a progressive direction for the municipality.

This is a meeting consisting of the entire senior management of the municipality aimed at taking stock of performance for the past two quarters since the beginning of the financial Year in July 2021 .

The same meeting is finding a way forward in accelerating performance and service delivery. Special focus is paid to the Mid Year Budget and performance assessment report.

At the opening of 2021/2022 MID year Performance Lekgotla the Mayor said This session should be not only be a matter of compliance but it should be our commitment to serve our communities by delivering basic services to them.

"I would like to call upon the Political wing to play their oversight role by making sure that all departments conduct business and observe financial management in a proper way.

As stated we are going to strengthen our public participation mechanisms to make sure that our people are informed of what is taking place in our Council.

Senior managers are fully aware of the fact that performance is tied to targets, this fact must serve as a guiding tool that must be borne in mind whilst executing their responsibilities. We must meet targets while conforming to standard practices" the Mayor said.

It will also enable new leadership to address some key transitional issues and commence with the processes of developing important programmes for its term of office.
