## 5. EVALUATING PERFORMANCE

1. The performance plan sets out-
  - i. the standards and procedures for evaluating the employee's performance; and
  - ii. the intervals for the evaluation of the employee's performance.
2. Despite the establishment of agreed intervals for evaluation, the employer may, in addition, review the employee's performance at any stage while the contract of employment remains in force.
3. Personal growth and development needs identified during any performance review discussion must be documented in a personal development plan as well as the actions agreed to and implementation must take place within set time frames.
4. The annual performance appraisals must involve:
  - (a) Assessment of the achievement of results as outlined in the performance plan:
    - (i) Each KPA should be assessed according to the extent to which the specified standards or performance indicators have been met and with due regard to ad hoc tasks that had to be performed under the KPA.

DM MR N.T

- (ii) An indicative rating on the five-point scale should be provided for each KPA
- (iii) The applicable assessment rating calculator must then be used to add the scores and calculate a final score.

(b) Assessment of the CCRs

- (i) Each CCR should be assessed according to the extent to which the specified standards have been met.
- (ii) An indicative rating on the five point scale should be provided for each CCR
- (iii) This rating should be multiplied by the weighting given to each CCR during the contracting process, to provide a score.
- (iv) The applicable assessment rating calculator must then be used to add the scores and calculate a final CCR score.

Overall Rating

- (i) An overall rating is calculated by using the applicable assessment-rating calculator. Such overall rating represents the outcome of the performance appraisals.
- (ii) The assessment of the performance of the employee will be based on the following rating scale for KPA's and CCR's:

| PERFORMANCE APPRAISAL OF KPAs AND CCRs |                                                                                                                                                                                                                                                                                                |        |                  |                                                                                                                                                                                                                                                   |
